Special Issue: 10th Andalusian Meeting on Discrete Mathematics

The Andalusian meetings on discrete mathematics provide high quality forums for recent developments, trends, and advances in all the areas of discrete mathematics and its applications. Moreover, the meetings are perfect occasions for Andalusian researchers to strengthen research collaborations between themselves and/or with foreign researchers. To celebrate this tenth edition, a special issue of *Discrete Applied Mathematics* will be devoted to a selection of extended papers on topics related to the themes (graph theory, algebraic combinatorics, algorithms and data structure, discrete geometry, and discrete models in engineering) of the meeting.

All interested researchers are invited to contribute to this special issue. The topics should relate to the themes of the workshop. Submissions of contributions not presented at the workshop are also welcome. Contributions arising from papers given at the conference should be substantially extended, and should cite the conference paper where appropriate.

All articles will be thoroughly refereed according to the high standards of *Discrete Applied Mathematics*.

The full papers must be submitted through the Elsevier Editorial System (<http://ees.elsevier.com/dam>). When submitting your paper, be sure to specify that the paper is a contribution for the Special Issue of the **10th Andalusian Meeting on Discrete Mathematics**, so that your paper will be assigned to the guest editors. Please see the Author Instructions on the site if you have not yet submitted a paper through this web-based system. Be sure to note that your work is intended for the Special Issue and to select the article type **SI: 10AMDM**.

The deadline for submission is **September 30th, 2017**.

Accepted papers will be published online individually, before print publication.

We are looking forward to receiving your contribution.

The Guest Editors,

Ismael González Yero

Juan Carlos Valenzuela Tripodoro
